

The Gross Regional Product (GRP) serves as a vital economic indicator, reflecting the economic output of San Diego County. Analyzing the GRP data from 2019 to 2023 reveals significant insights into the region's economic performance and growth trends. Over these years, the total GRP has shown a consistent upward trajectory. In 2019, the GRP was approximately \$244.28 billion. Despite the challenges posed by the COVID-19 pandemic, 2020 saw a slight increase to \$244.82 billion. The following year, 2021, marked a significant rise to \$268.87 billion, indicating a robust economic recovery. This upward trend continued in 2022, with the GRP reaching \$296.68 billion, and further increased to \$308.71 billion in 2023, reflecting sustained economic growth. Alongside the total GRP, the per capita GRP also demonstrated growth, starting at \$73,347 in 2019 and increasing to \$74,278 in 2020. By 2021, it rose notably to \$82,100, aligning with the overall GRP growth. The per capita GRP continued to climb, reaching \$90,557 in 2022 and further increasing to \$94,916 in 2023, indicating improved economic productivity per individual.

Year	Total GRP (Billion \$)	Per Capita GRP (\$)
2019	244.28	73,347
2020	244.82	74,278
2021	268.87	82,100
2022	296.68	90,557
2023	308.71	94,916

The GRP data also sheds light on the contributions of various industries to San Diego County's economy. The government sector has consistently been the largest contributor, with a GRP of \$45.19 billion in 2019, increasing to \$52.92 billion in 2023. Manufacturing remains a significant sector, contributing \$28.26 billion in 2019 and \$31.67 billion in 2023. The professional, scientific, and technical services sector has shown robust growth, with contributions rising from \$28.13 billion in 2019 to \$37.04 billion in 2023. Health care and social assistance is another major sector, with GRP increasing from

\$15.38 billion in 2019 to \$20.21 billion in 2023. Additionally, the finance and insurance industry has seen growth, with contributions rising from \$14.67 billion in 2019 to \$19.50 billion in 2023. Overall, San Diego County's economy has demonstrated resilience and growth over the past five years, with a steady increase in both total and per capita GRP. The government, manufacturing, and professional services sectors have been key drivers of this growth, suggesting a positive economic outlook for the region with continued expansion and development across various industries.
