

San_Diego_County_GRP_Analysis_2019_2023.pdf

The Gross Regional Product (GRP) of San Diego County has shown remarkable growth from 2019 to 2023. In 2019, the GRP was approximately \$244.28 billion. Despite the economic challenges posed by the COVID-19 pandemic, the GRP increased slightly to \$244.82 billion in 2020. This modest growth was followed by a significant recovery in 2021, with the GRP rising to \$268.87 billion. The upward trend continued in 2022, reaching \$296.68 billion, and by 2023, the GRP had further increased to approximately \$308.71 billion. This represents a total growth of approximately \$64.43 billion over the five-year period.

In terms of economic productivity per person, the per capita GRP in San Diego County also saw a notable increase. In 2019, the per capita GRP was approximately \$73,347. By 2023, this figure had risen to approximately \$94,916, indicating a significant enhancement in economic productivity per individual over the period. When compared to broader benchmarks, San Diego County's per capita GRP in 2023 was higher than the state average of California, which stood at \$93,800, and significantly exceeded the national average of \$77,366. This suggests that San Diego County has maintained a relatively strong economic performance compared to both state and national levels.

	Year	GRP (Billion \$)	Per Capita GRP (\$)	
	2019	244.28	73,347	
	2020	244.82	-	
	2021	268.87	-	
	2022	296.68	-	
	2023	308.71	94,916	

The growth in San Diego County's GRP can be attributed to several key sectors. The Government sector consistently had the highest contribution, with \$52.92 billion in 2023. The Professional, Scientific, and Technical Services sector also demonstrated strong growth, reaching \$37.04 billion in 2023.

Additionally, Manufacturing remained a significant contributor, with \$31.67 billion in 2023. These sectors have played pivotal roles in supporting the county's robust economic growth from 2019 to 2023.
