

The Gross Regional Product (GRP) of San Diego County has shown a remarkable trajectory from 2019 to 2023. In 2019, the total GRP was \$244.28 billion, with a population of 3,330,458, resulting in a GRP per capita of \$73,346.92. The following year, despite the challenges posed by the COVID-19 pandemic, the GRP slightly increased to \$244.82 billion. This resilience is further highlighted by the rise in GRP per capita to \$74,277.60, even as the population decreased to 3,296,045. By 2021, the county experienced a significant economic recovery, with the GRP climbing to \$268.87 billion and the GRP per capita reaching \$82,099.95. This growth reflects an improved economic productivity and output per person. The upward trend continued in 2022, with the GRP reaching \$296.68 billion and the GRP per capita increasing to \$90,557.10, indicating strong economic performance and an increase in the economic value generated per resident. In 2023, the GRP peaked at \$308.71 billion, with a GRP per capita of \$94,915.87, suggesting sustained economic growth and efficiency in San Diego County's economy. Over this five-year period, the GRP grew by approximately 26.4%, and the GRP per capita rose significantly, underscoring a resilient and expanding economy in the region.

Year	Total GRP (billion)	Population	GRP per Capita
2019	244.28	3,330,458	73,346.92
2020	244.82	3,296,045	74,277.60
2021	268.87	3,274,954	82,099.95
2022	296.68	3,276,208	90,557.10
2023	308.71	3,252,468	94,915.87
