

The Gross Regional Product (GRP) of San Diego County from 2019 to 2023 demonstrates a consistent upward trend, reflecting economic growth over this period. In 2019, the GRP was approximately \$244.28 billion, serving as the baseline for our analysis. Despite the challenges posed by the COVID-19 pandemic, the GRP slightly increased in 2020 to approximately \$244.82 billion, showcasing the region's economic resilience. The year 2021 marked a significant recovery with the GRP rising to approximately \$268.87 billion, a growth of about 9.82% from the previous year. This indicates a strong economic rebound post-pandemic. The upward trajectory continued in 2022, with the GRP reaching approximately \$296.68 billion, reflecting a growth of about 10.34% from 2021. This sustained economic expansion highlights the robust recovery phase. In 2023, the GRP further increased to approximately \$308.71 billion, marking a growth of about 4.06% from 2022. Although the growth rate slowed compared to the previous year, it suggests a stabilization phase following the rapid recovery from the pandemic-induced economic downturn. Overall, over the five-year period, San Diego County's GRP increased from approximately \$244.28 billion in 2019 to \$308.71 billion in 2023, representing a total growth of about 26.41%. This data underscores the resilience and growth potential of San Diego County's economy, particularly in the post-2020 period, with significant increases in 2021 and 2022.

San Diego County GRP (2019-2023)

Year	GRP (Billion \$)	Growth (%)
2019	244.28	-
2020	244.82	0.22
2021	268.87	9.82
2022	296.68	10.34
2023	308.71	4.06
