

San_Diego_County_GRP_Analysis_2019_2023.pdf

The Gross Regional Product (GRP) of San Diego County from 2019 to 2023 demonstrates a consistent upward trend, reflecting significant economic growth over this period. In 2019, the GRP was approximately \$244.28 billion, and by 2023, it had increased to about \$308.71 billion. This growth represents a total increase of approximately \$64.43 billion over the five-year span. The annual growth rate highlights the resilience and recovery of the region's economy. From 2019 to 2020, the GRP saw a slight increase from \$244.28 billion to \$244.82 billion, showcasing the county's ability to withstand the global economic challenges posed by the COVID-19 pandemic. A more substantial increase occurred from 2020 to 2021, with the GRP rising to \$268.87 billion, indicating a recovery phase. The growth continued in 2022, reaching \$296.68 billion, and by 2023, the GRP further increased to \$308.71 billion.

In terms of per capita GRP, there was a notable increase from 2019 to 2023. In 2019, the per capita GRP was approximately \$73,347, and by 2023, it had risen to about \$94,916. This increase suggests that economic growth outpaced population growth, leading to higher economic output per person. When compared to state and national levels, San Diego County's per capita GRP in 2023 was \$94,916, which was higher than the California state average of \$93,800 and significantly above the national average of \$77,366. This indicates that San Diego County's economy is performing well relative to both state and national benchmarks.

Year	GRP (Billion \$)	Per Capita GRP (\$)
2019	244.28	73,347
2020	244.82	-
2021	268.87	-
2022	296.68	-
2023	308.71	94,916

Key sectors contributing to the GRP include Government, Professional, Scientific, and Technical Services, and Manufacturing. The Government sector consistently contributed the highest dollar value to the GRP each year. Meanwhile, the Professional, Scientific, and Technical Services sector showed significant growth, reflecting the county's strong presence in innovation and technology. Overall, San Diego County's GRP data from 2019 to 2023 reflects a robust and growing economy, with significant contributions from key sectors and a per capita GRP that surpasses both state and national averages.
