

The Gross Regional Product (GRP) of San Diego County has shown remarkable growth from 2019 to 2023. In 2019, the GRP was approximately \$244.28 billion, and by 2023, it had increased to about \$308.71 billion. This represents a significant rise of approximately \$64.43 billion over the five-year period. The annual growth trajectory highlights the county's economic resilience and recovery, especially in the face of global challenges such as the COVID-19 pandemic. From 2019 to 2020, the GRP saw a slight increase from \$244.28 billion to \$244.82 billion, demonstrating stability during a tumultuous time. The following year, 2021, marked a strong recovery with the GRP rising to \$268.87 billion. This upward trend continued in 2022, reaching \$296.68 billion, and further increased to \$308.71 billion in 2023.

In terms of per capita GRP, there was a notable increase from approximately \$73,347 in 2019 to about \$94,916 in 2023. This substantial rise indicates an improvement in economic productivity per person over the period. When compared to state and national levels, San Diego County's per capita GRP in 2023 was higher than the California state average of \$93,800 and significantly above the national average of \$77,366. This suggests that the county enjoys a relatively high level of economic productivity compared to broader benchmarks.

Year	GRP (Billion \$)	Per Capita GRP (\$)
2019	244.28	73,347
2020	244.82	N/A
2021	268.87	N/A
2022	296.68	N/A
2023	308.71	94,916

The economic landscape of San Diego County is supported by diverse sectors, with Government, Manufacturing, and Professional, Scientific, and Technical Services playing pivotal roles. The

Government sector consistently contributed the largest share to the GRP, amounting to \$52.92 billion in 2023. Manufacturing and Professional, Scientific, and Technical Services also made strong contributions, with \$31.67 billion and \$37.04 billion respectively in 2023. Overall, San Diego County demonstrated robust economic growth from 2019 to 2023, with significant increases in both total GRP and per capita GRP, outperforming state and national averages.
